### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The Second Declaration under 37 CFR 1.132 mailed on July 21, 2004 was not signed by the inventor, Octavian Anton, and needs to be signed to make an official document showing the difference between the claimed invention and the prior art.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest the recited microporous heat insulation body. Independent claim 5 identifies the uniquely distinct features of a substrate that include "the heat insulation body being non-cracked as by dry-compressing". The closest prior art of record, Kratel et al. (USPN 5,556,689) in view of Takahashi et al. (USPN 4,647,499), disclose a microporous heat insulation body, which either singularly or in combination, fail to anticipate or render obvious the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
